

Welcome to Glass

Setup

Here we'll help you get comfortable with Glass, and then run through some of the exciting things you can do.

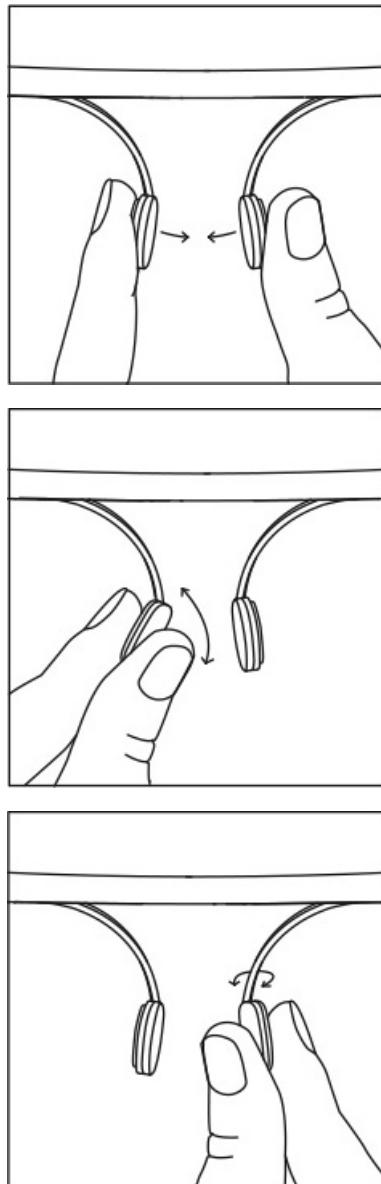

Before we get started, you'll need:

- Glass
- A [Google Account](#) with [Google+](#) and [Gmail](#)
- A phone with Bluetooth turned on

Got everything? Let's get started.

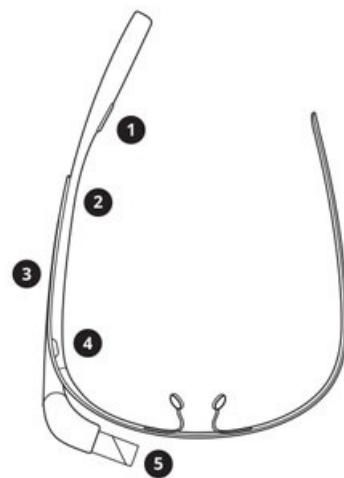

[Learn more](#) or [contact us](#).

Adjusting the nosepads

Time to try on Glass. Put them on like you would with your favorite pair of eyeglasses. Adjust the nosepads so they are flush with your skin and the display sits just above your eye and not in front of it. Move the display hinge until you can see the whole display. And don't worry—the frame is surprisingly durable, so don't hesitate to bend it to fit your face.

Getting to know Glass

- 1** Listen
- 2** On / Off
- 3** Touch
- 4** Capture
- 5** See

Listen

Audio comes from an oval speaker on the inside of the battery pod, just behind your ear. When flush against your head, you'll hear notifications, phone calls, and other sounds from Glass.

On / Off

The circular power button is on the inner enclosure near your right temple. Press down firmly to turn the device on and off. The power LED at the end of the enclosure lights up when Glass is starting up, charging, or powering down.

Touch

The touchpad lies along the right side of Glass. Swipe forward or backwards to navigate your timeline. Swipe down to go back or return to the Home screen.

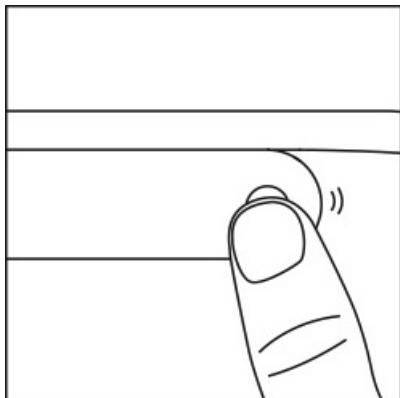

Capture

Press the camera button to take a picture. Hold it down to record a video.

See

The plastic cube that enters you into the world of Glass. The display shows you all types of information from the current time to your emails, videos, search results, and more.

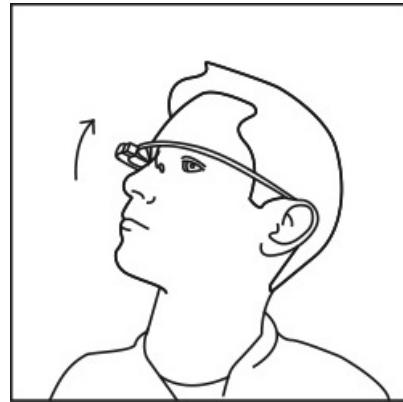

Turning Glass on

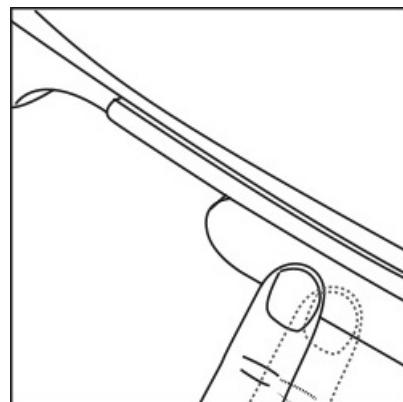

1. To turn Glass on, press the power button on the inside of Glass.
2. The power LED will turn on and Glass will boot up.
3. Look for the Glass logo to appear on your display.

Interacting with Glass

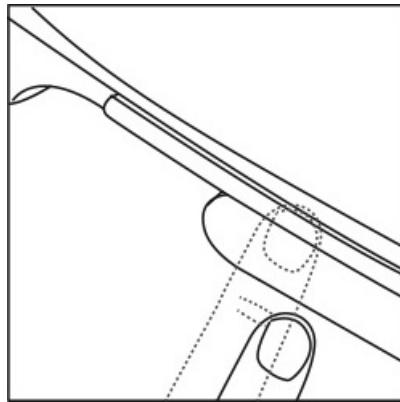

Time to take Glass for a spin. Learn how to interact with the device through the touchpad, voice actions, and other useful functions.

Tap your touchpad or nod your head up to activate your display

Swipe forward or backwards to navigate through your timeline

Swipe down to cancel an action or go back to the Home screen

Swipe forward on the touchpad and the cards to the right will cycle through your display. The row of cards is called the timeline. Picture it as a row of cards that wraps around your head. To the right of the Home screen, the timeline includes a history of your notifications and actions like pictures and messages.

Tap the touchpad to see actions (like as *share* or *delete*) related to that card. If a card has a folded corner, tap to view and slide through the bundle of related cards.

Swipe backward on the touchpad to navigate to the left of the Home screen. To the left of the Home screen, you'll see timely and location-specific information like the weather and other cards Glass thinks you might be interested in.

Contacts

Edit and star all of your Google contacts, and talk to them through Gmail, Hangouts, SMS or by phone. Up to 20 of your most recent and starred contacts will be sorted for quick and easy voice access. The rest are just a swipe away.

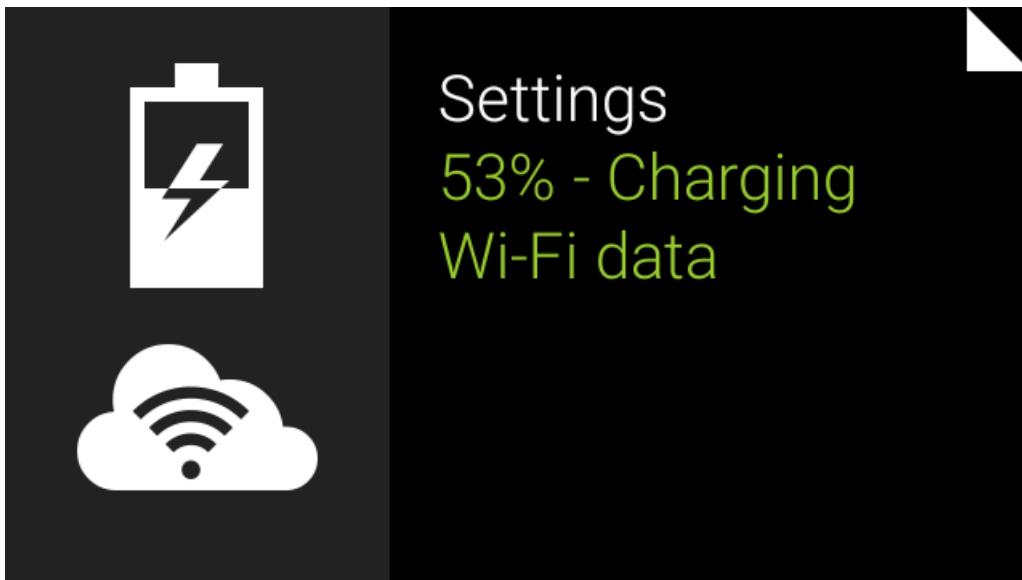

[Learn more](#) or [contact us](#).

Add Glassware

Enhance your Glass experience with Glassware, which are lets you do things like read [Gmail](#) messages, share posts on [Google+](#), and catch the latest news from [CNN](#).

[Learn more](#) or [contact us](#).

Settings

The Settings card is all the way to the left of your timeline. Tap it to see the device info and to customize and calibrate your device.

For example, try calibrating the On-head detection feature. This will automatically turn off Glass when you take it off, and turn it on when you put Glass on. From the Settings card, swipe forward until you see the On-head detection card. Tap the card and select **calibrate**.
